BISA AI Academy (PT BISA ARTIFISIAL INDONESIA)
Studi Independen (HACKER)
February 2022 - July 2022 (6 months)
Indonesia

1. The independent study program by Kemdikbud for 5 months was an enriching experience. During the program, I attended various learning sessions that provided insights into research methodologies, data analysis, and machine learning concepts.

2. I was responsible for creating daily, weekly, and final reports to track my progress throughout the program. These reports helped me reflect on my learning journey and identify areas that required improvement.

3. The program's highlight was completing a real-case project on machine learning modeling to identify cats and dogs. This project challenged me to apply my knowledge of machine learning algorithms, data pre-processing, and data visualization to create an accurate model.

In summary, during the independent study program, I attended various learning sessions, created progress reports, and completed a real-case project on machine learning modeling. The program allowed me to enhance my skills and knowledge in the field of machine learning and work independently while also receiving guidance and support.

Universitas Serang Raya (UNSERA)
